To Whom It May Concern:

Hi, my name is Emily Schaefer. I'm a concerned Wisconsinite, writing about the proposed Midtown Data Center. In an already heavily segregated city such as Milwaukee, a data center would be catastrophic and detrimental to the residents of the area. Other data centers have shown to have high levels of noise, pollution of drinking water, and other health outcomes the likes of which we are not aware. The people who live in Midtown have made it clear that they do not want this data center! Have a heart and a conscience and listen to those who will be directly affected by this proposition and DO NOT BUILD THE DATA CENTER! The land could be used instead for something which would benefit the community instead of something that increases the surveillance state of our country, hastens climate change and impending weather disasters, and possibly has unforeseen health consequences. Milwaukee is the most segregated city in the nation and this has led to poor health outcomes in the people who live in these communities which are predominantly Black, such as having the highest rates of lead poisoning due to so many lead pipes in the area. Don't let this data center happen! The people have made it clear they do not want this. Listen to them!

Thanks,

Emily Schaefer
