ATTN: CLAIMS

Original notification of details to DPW on 2/19/2019, Conf #101002638608, then transferred to City Clerk Office

On February 19, 2019, I hit a combined pot hole and lip of a sewer lid. My right front tire literally exploded, the air left the tire immediately and the rim was bent. This event occurred around early afternoon as I headed SW on Lisbon Ave and was approaching 84th street in front of Marco's pizza. I don't usually aim for pot holes. Lisbon Ave from Capitol drive to Burleigh has a collection of holes all over that road and I was able to dodge all of them except the one noted in picture. I never saw it and I am a defensive driver. I went there the next day to take pics of this area and it already had a fresh patch. I realize that the patch crews are overwhelmed this winter. They have to be extra careful especially with the chaotic nature of speeders around them and the recent tragic events.

I am requesting the following reimbursement for all costs on the damage to my 2013 Ford Fusion.

Two tires (Two tires required for correct alignment and safety. Before mishap, both tires had plenty of tread to allow for years of service)

Front end alignment, balancing and road hazard.

Other incidental fees and taxes paid.

I've attached all pertinent pictures for this claim. The repair was done at Blain's Farm & Fleet. As the repair needed immediate attention, they quoted the lowest price and comparable dependable service. The receipt is enclosed and all the amounts that the City of Milwaukee should pay to cover this repair.

The total is \$488.78

Thank you,

Tim Fritsch

*** Customer Wishes To Discard Old Parts ***

I understand that all alloy and dual wheel lug nuts must be re-torqued within 50 miles and rechecked periodically.

Your tires are special order tires which must be paid in full before we can create the order. There will be 15% restocking fee if you choose not to have these tires installed.
 Customer Initial _____

NOTICE: Applying tires to your vehicle with a lower speed rating than the original equipment tire on your vehicle is not recommended and may change the handling and performance of the vehicle. Your vehicle should not be operated at speeds in excess of the rating for the replacement tires. Leading tire manufacturers recommend that the tires with the best traction be mounted on the rear of the vehicle, even on front wheel drive vehicles, for better performance on wet and slick roads.
