Subject: Proposed Data Center Testimony
Date: Thursday, May 14, 2026 11:50:58 AM

Some people who received this message don't often get email from burkhardtmc@proton.me. [Learn why this is important](#)

TLDR: No no no no We do not consent to prioritizing profit, planet destruction and greed over our communities.

Are you kidding me???? Data centers have destroyed communities drinking water, there are places that put off a constant hum of data centers that have caused medical issues for community members.

We already have food deserts, we already have documented racism in housing, and we're going to add a data center that will impact marginalized folks? Absolutely not. I'm embarrassed that this is being proposed. I am ashamed that anyone would consider this a good idea.

Our planet is being destroyed by data centers. Our drinking water is running out. Don't contribute to the acceleration of all of this.

Maybe spend time and energy ensuring access to quality food/groceries in Milwaukee? Maybe spend time fixing the damn potholes? Maybe spend your energy doing Literally anything else.

To reiterate, I strongly oppose building a data center here or anywhere in Milwaukee.

Disrespectfully,
MC Burkhardt
