Hi Linda,

Below are responses, with supporting documentation attached, to questions raised at Steering and Rules on 01/09 regarding DNS's efforts in the 53206 zip code. Please let me know if you have any additional questions.

- Can we identify the total amount of fees charged related to GBG (garbage clean up) orders?
 - o The amount of funds expended to contractors from the revolving account for 9850 cleanups in 2019 was \$1,052,114.35

- Can we generate a heat map of the illegal dumping cases in 53206?
 - o See attached heat map

- How many GBG referrals do we receive from DPW or other city departments?
 - o These referrals are most often received and entered by DNS clerical staff. This is the same method we use to enter complaints from citizens so we cannot distinguish one group from the other.

- How many illegal dumping cases occur on city owned property?
 - o The Department of City Development is better positioned to provide this information.

- Can we compare these numbers to other zip codes?
 - o See attached spreadsheet comparing total complaints by zip code.

Thank you,

Mike
