

1. Describe the proposed ordinance or resolution.

DPW-Sanitation Services has been awarded a Wisconsin Department of Transportation CMAQ grant for \$135,000 (Grantor share is \$108,000, City share is \$27,000). This grant would pay for software to optimize sanitation packer routes to reduce the amount of air pollutants produced during sanitation operations.

2. Identify the anticipated equity impacts, if any, of this proposal.

This proposal should provide improved air quality for all Milwaukee residents.

3. Identify which minority groups, if any, may be negatively or positively impacted by the proposal.

All groups would be provided equal benefit as this software would apply to all packer routes, which serve all groups within Milwaukee.

4. Describe any engagement efforts with minority communities potentially impacted by the proposal.

There are no engagement plans as this software would improve service in all communities during normal sanitation services.

5. Describe how any anticipated equity impacts of the proposal will be documented or evaluated.

The anticipated equity impacts will be developed relative to the routes being advised by the software. A program evaluation schema will be developed once a software is chosen and the department has an understanding how the software will operate conceptually and practically from an operational and community perspective.

6. Describe strategies that will be used, if any, to mitigate any anticipated equity impacts.
