## Deborah L Pasha, R.N., B.S.N.

---

### Objective

Promote optimal health status of a diverse population through culturally sensitive interventions targeting individuals, families, communities and systems.

### Professional Experience

**9/00–Present**                      **WI Division of Public Health**                      **Milwaukee WI**  
**Public Health Nursing Consultant**

- ◆ Provide technical assistance to administrative public health staff regarding strategic planning, records management, policy and procedure development, internal capacity review, public health system development, fiscal management, program planning and evaluation, contracting, personnel management, proposal writing and grants management.
- ◆ Provide consultation to local public health nursing staff to assure services are population-based, show cultural awareness and sensitivity focused at the individual, community and system levels, and guided by the core functions and the essential services of the public health system.
- ◆ Provide technical assistance to local health departments/community partners and state staff to assure that Public Health services address local community needs, resources and preferences, and statute and rule requirements. Regional representative for Children with Special Healthcare Needs and Wisconsin Well Women programs.
- ◆ Assure an efficient, effective, equitable and coordinated public health system at the state, regional and local level, particularly as it effects public health nursing. Assess contemporary and emerging issues to determine their effects on the health of the public at the local, regional and statewide levels.
- ◆ Promote high quality public health nursing competencies through education, training, research and the development of resources critical to public health nurses capacity to carry out essential public health services.
- ◆ Develop and advance community-wide initiatives which provide education regarding the health benefits of physical activity and impact on the priority health problems, and promote collaboration regarding improvements in access to safer physical activity opportunities.

**5/89–9/00**                                      **Milwaukee Health Department**                      **Milwaukee, WI**  
**Public Health Nurse**

- ◆ Addressed individual and population-based concerns related to communicable and other diseases, substance abuse, neglect/abuse, lead poisoning and other environmental issues. Travel Clinic and Breast Cancer Awareness Project experience.
- ◆ Provided field experience for nursing and medical students. Developed marketing strategies and revised clinic forms.
