**“SOLAR NOW” SOLAR PV SYSTEM HOSTING PILOT PROGRAM**AVAILABILITY

This pilot program is available to customers of Wisconsin Electric Power Company (the “Company”) who desire to host a company-owned Solar PV System (defined for purposes of this pilot program as solar panels, inverter(s), cabling, mounting, trackers – if applicable - and associated controls) with up to 2.25 MW<sub>ac</sub> nameplate capacity on their rooftop or ground mount site. There is a total cap of 35 MW<sub>ac</sub> available for this pilot of which 10 MW<sub>ac</sub> of nameplate capacity will be reserved for non-profit customers (school district, local government, church, etc.). Participation in this pilot program will be limited to customers on a commercial or industrial rate.

RATE

A customer participating in this pilot program will receive a monthly payment for hosting the Solar PV System. The lease payment paid by the Company to the customer shall be the value of the Midcontinent Independent System Operator (“MISO”) accredited capacity of the Solar PV System multiplied by the value of capacity, as defined below, up to the customer’s firm demand at the time the service agreement is entered into. The lease payment shall be paid to the customer in monthly installments equal to one twelfth (1/12<sup>th</sup>) of the annual amount.

The value of capacity for a Solar PV System will be determined at the time the service agreement between the Company and the customer is executed, as determined by MISO’s then current Business Practice Manual (“BPM”), and will be fixed for the duration of the service agreement. The value of capacity is the MISO zone 2 cost of new entry (CONE) for the MISO Resource Adequacy Planning Year in which the service agreement is executed. This value of capacity definition is subject to change.

Customers entering into a service agreement under this pilot will be responsible for all rates, adjustments, and credits specified in the customer's otherwise-applicable rate schedule. This includes, but is not limited to, facilities charges; energy charges; fuel cost adjustment; on-peak and customer maximum demand charges; and minimum charges, all based on the customer’s actual consumption for the billing period, at the rates under their otherwise applicable rate schedule.

Nothing in this pilot program shall prevent a customer from taking service under schedules ERER-1, ERER-2, ERER-3 or ERER-4, also known as the Company’s “Energy for Tomorrow” programs.

All energy generated by a Solar PV System subject to this pilot would be delivered to the Company’s distribution system and all rights to renewable energy attributes would remain with the Company.

---

**“SOLAR NOW” SOLAR PV SYSTEM HOSTING PILOT PROGRAM**CONDITIONS OF DELIVERY

1. Participation in this pilot program requires a written service agreement between the Company and the customer. Each written service agreement will address, among other topics, the following: (a) duration of the service agreement, (b) size of the system, (c) basis of the lease payment, (d) insurance requirements related to the Solar PV System, (e) the survival of the lease, and all associated terms, if the property is sold or transferred during the term of the lease, and (f) decommissioning of the Solar PV System at the end of its life.
2. The Company will retain ownership of and responsibility for the operation and maintenance of each Solar PV System subject to this pilot.
3. An individual customer, which is defined by tax ID for non-governmental entities or a single unit of government (e.g., municipality, county, school district, etc.) may host multiple Solar PV Systems up to a total of 2.25 MW<sub>ac</sub> in aggregate. Customers hosting aggregated systems of this sort will not be able to exceed the firm demand of each aggregating customer's firm demand for purposes of the pilot program. The details regarding aggregation and billing will be addressed in individual service agreements.
4. Participation in this pilot program may be limited by the Company. For example, the Company reserves the right to limit customer participation in this pilot based on a customer's bill payment and collection history. Further, participation shall be subject to an assessment of the solar resource and structural and environmental engineering suitability of the identified rooftop or ground mount location.
5. All other Conditions of Delivery of the customer's applicable rate schedule(s) shall apply. If there is a discrepancy between the base rate schedule and this tariff, this tariff shall govern.
