Subject: RE: Connector

Based on the county board resolution that I have in my possession, and assuming it was not amended on the floor of the county board meeting today, the county board voted 16-3 that the Milwaukee County Transit System should operate any system that the Connector Study eventually recommends and adopts. The county board did not endorse the \$300 Million guided bus system nor vote to move that specific alternative to preliminary engineering.

By the way, I agree that the Milwaukee County Transit System should operate any new system adopted under the connector study.
