SUMMARY STATEMENT

The Resident Preference Program began in 1991 and requires that a set percentage of all hours worked on Department of Public Works construction contracts be worked by residents of a designated area of the City of Milwaukee. Since 1991 steady progress has been made in hiring and putting to work target area residents. From a modest start of 14.6% of the hours worked in the last quarter of 1991, the latest available figures for 2000 (based on the 40% of contracts completed) show 33.6% of the total hours worked on construction contracts worked by target area residents. Although the final figures for all of 2000 are not available, the current figures from closed-out contracts show that 50.7% of the construction hours worked were by persons residing in the City of Milwaukee.

As the summary data on the following page indicates, the Department of Public Works (DPW) has, in the aggregate, always exceeded the percentage required by the Resident Preference Program. The required percentage has been increased twice since the beginning of the program, starting at 14% in 1991 to the current 25%.

The DPW has always partnered with community agencies to assist contractors in finding resident workers and to assist the agency in finding jobs for applicants. Currently the DPW is working with the Esperanza Unida, 1329 West National Avenue. The DPW is working successfully with Esperanza Unida after working with Central City Workers Center for several years.

Also, on the following page is data concerning the certification of resident workers. This data indicates that new workers are certified on an annual basis. New workers entering the program show that the program is not a static program and that the program does have some turnover in participants.

2000 RESIDENCY PREFERENCE PROGRAM SUMMARY DATA

2000 Department of Public Works Contracts

Total Contracts	138
Non-Construction Contracts	-6
Informal Contracts	-4
Contracts Cancelled	-1
Formal Construction Contracts	127
Formal Contracts with less than 25% Resid	lency 4

Resident Participation Summary

Year	Required %	Actual %	Total Contracts	Contracts Closed
1991	14%	14.6%	26	All
1992	14%	18.5%	210	All
1993	21%	21.3%	179	All
1994	21%	22.3%	197	All

CONTRACTS REQUIRING LESS THAN 25% RESIDENT PARTICIPATION

In 2000 there were 127 construction contracts advertised by the Department of Public Works. There were four of these construction contracts that required less than 25% Resident Participation. These four contracts are highlighted on the 2000 contract listing. The decision to lower the Resident Participation level was made after discussions with the contracting division concerning the type and exact method of construction involved in the contract. The decision to lower the participation on each of these contracts was made based on the information below.

Contract C523000005	This contract involved the seal coating of various streets. A new method of seal coating was used on this contract that was only applied by contractors located outside the Milwaukee Metropolitan area. It also required special equipment and trained personnel to apply the seal coating. There was no work possible under the contract for local new hires.
Contract C545000009	This was a very small contract that involved the installation of a special exhaust system. A small crew of 1 or 2 people does the work and a contractor from outside the Milwaukee Metropolitan area is a bidder on this work.
Contract C545000077	This was a small contract that involved the installation of a chiller on the roof of the 809 Broadway Building. The contract was primarily equipment and involved a small crew of 1 or 2 people.
Contract C641000084	This was primarily equipment and involved a small crew of 1 or 2 people. There was other work on the contract that could be performed by local workers and therefore the requirement was reduced to 15%.

The Commissioner of Public Works may determine to include resident requirements on other (non-construction) contracts. In 2000 there were 6 non-construction contracts advertised by the Department of Public Works. None of the six contracts included resident requirements. These contracts are service type contracts and do not involve many personnel. The work tends to be very sporadic and it would be very difficult to provide resident workers.
