Hello Members of the Common,

It has been brought to my attention that the Council will be considering file 200984. This file would increase the penalty for businesses that violate enforcing mask, social distancing, and capacity limit. I respectfully request that you dismiss this file, as many businesses are already under so much strain financially. If this file goes through it will be the straw that breaks the camel's back for many businesses. Thank you for listening,
Mary Rom
