Subject: RE: City Department Budgets for CDBG Funding request
Attachments: MHD_LEAD.pdf; DNS_ Neighborhood Cleanup_Code Enforcement.pdf; RACM_Admin.pdf

Alder Davis, your request to me was for current budget and descriptions for RACM Administration, Health Department - Lead Paint Prevention and Abatement, and Department of Neighborhood Services- Code Enforcement Inspectors Targeted Enforcement Program
Department of Neighborhood Services - Neighborhood Clean-up Program

These documents were delivered to the Common Council front desk in a CDGA envelope addressed to you on Tuesday, November 11th. See Attached I have requested the 2015 budgets from the Budget Office for City Departments and will forward them immediately upon receipt.

Subject: City Department Budgets for CDBG Funding request

Dear Mr. Mahan,

I previously requested itemized budgets from City Departments that are recommended for 2015 funding of CDBG grants with no response from you. As you know, amendments to the administration's recommendations of the Funding Allocation Plan are due today at noon. I'll make my request this time in writing for the city departments itemized budgets for the proposed use of recommended funds for the year 2015.

Best regards,

Alderman Joe Davis, Sr.
Chairman, Community & Economic Development Committee

Alderman Joe Davis, Sr.
Chairman, Community & Economic Development Committee

PROGRAM NARRATIVE

Milwaukee Health Department (In-House) Lead Paint Prevention/Abatement Program

1. **Households/Clients Served:** Describe the specific households/persons to be served, including target low income level and special needs populations, as applicable.

Low-income, very low-income and extremely low income households are the direct beneficiaries of the Lead Based Paint Prevention/Abatement Program which is implemented by the City of Milwaukee Health Department (MHD). Housing that was built prior to 1950, located within the Childhood Lead Poisoning Prevention Program target area, with an assessed property value of less than \$150,000 is targeted for participation. All rental properties must have low-income renters

2. **Outreach:** Indicate all of the methods that will be used to inform eligible persons about your program.

The outreach and marketing process includes community awareness via health fairs, community programs, housing resource fairs and partnerships with other community advocates who make regular referrals to the Program.

Additional methods include: 1) direct interface with rental property owners regarding enforcement of lead abatement work orders and making them aware of voluntary lead hazard reduction efforts which can be partially funded, 2) mass mailings to rental property owners, 3) collaborative relationships with other City of Milwaukee housing programs, 4) word of mouth, and 5) community-based health fairs.

3. **Activity/Goals and Timelines:** Describe the specific activity to be performed, the numeric goals of the program, method and the timetable for implementation.

Lead hazard reduction per Milwaukee's evidence-based lead safe housing standard will take place in 100 housing units. Lead hazard reduction includes window replacement or Milwaukee's double jamb liner treatment to high risk window components (approximately 13 windows per housing unit) and lead safe maintenance to other less risky but deteriorated painted surfaces. The cost of lead hazard controls including the abatement of window hazards is estimated at approximately \$5,000.00 per unit. Property owners are required to correct all outstanding building code violations, be current with their property taxes and conduct lead safe maintenance. Approximately 8-9 housing units will receive lead hazard reduction each month to successfully fulfill the annual goal of 100 housing units.

Method: Based on outreach efforts, property owners will submit applications. If they fulfill the eligibility criteria, all children under the age of six that reside at the property will be offered a blood lead test and education will be offered by a Public Health Services Assistant or Public Health Nurse. A MHD Lead Program Risk Assessor will conduct a lead based paint risk assessment and inspection of the property. Hazards will be indicated on the Scope of Work and will be paid for by the owner and the program. The lead abatement will be monitored for work quality and lead safe practices daily by the Risk Assessor. Upon completion, the Risk Assessor will conduct dust wipe clearance tests to assure lead safety. Contractors are paid by the MHD once lead abatement clearance is achieved.

4. **Program Outcomes:** The expected long term outcomes from CDGA's funded programs are: **1) Reduce Crime; 2) Increase Property Values; 3) Increase Economic Vitality; and, Improve Quality of Life.** Towards this end, describe the short term and midterm outcomes (results, impact or change expected to come about as a result of your program).

The Lead Based Paint Prevention/Abatement Program will conduct lead hazard reduction in 100 high risk housing units within the lead program target area. In the short term this will increase property values, create and maintain jobs for lead abatement workers (increase economic vitality) and improve the quality of life for families residing in these properties. In the long term, this funding will assist in the eradicating childhood lead poisoning in the City of Milwaukee. Each year it is expected that lead poisoning prevalence rates will continue to decline as they have for the last 14 years:

YEAR	Prevalence rate	Numerator (children with lead levels > 10)	Denominator (children tested)
1997	31.9%	6550	20,506
1998	26.4%	5208	19,719
1999	23.5%	4198	17,883
2000	19.3%	3656	18,992
2001	16.5%	3563	21,565
2002	14.1%	3217	22,813
2003	11.3%	2586	22,815
2004	9.8%	2364	24,007
2005	8.3%	1865	22,510
2006	6.6%	1415	21,738
2007	5.9%	1393	23,716
2008	4.8%	1193	24,934
2009	4.4%	1194	27,047
2010	3.4%	1029	30,260
2011	3.2%	1018	31,509
2012	3.3%	974	29,276

5. If applicable, describe existing collaborations with other agencies, residents and/or other entities which are necessary for performance of the activity.

The success of this initiative is dependent on cooperation established by the MHD between property owners, tenants and lead abatement contractors. Additionally, the MHD Childhood Lead Poisoning Prevention Program has established relationship with many community and faith-based organizations and government housing agencies to assure identification and referral of high risk housing. Finally, inter-Department collaboration (with DNS, DCD and CDGA) and support has been instrumental in assuring the creation of lead-safe housing in Milwaukee.

6. Describe your agency's specific experience in providing the requested services, accomplishments and successes specific to the activity for which you are applying. Include staff expertise.

The MHD Childhood Lead Poisoning Prevention Program has been in existence since 1992. As of September 2013 16,590 lead-safe housing units have been produced as a result of voluntary participation or enforcement efforts. Thousands of residents each year are reached by MHD and community-based staff with education, blood lead testing and nursing services. The Lead Program Management Team is well-established and the 9 Lead Program Risk Assessors have multiple years of experience. The MHD Lead Program is recognized as a national model and has received several Best Practice awards from HUD and the National Association of City and County Health Officials (NACCHO), as well as a 2007 Distinction Award from the United Conference of Mayors Lead-safe for Kids Sake program.

7. Describe other resources leveraged for the activity for which you are applying.

The MHD's Childhood Lead Poisoning Prevention Program is largely funded by Federal and State grants to assure a comprehensive response to the problem of childhood lead poisoning, which in 2011 included the award of ~\$4,500,000.00 in lead abatement funding through the U.S. Department of Housing and Urban Development. The knowledge, capacity and infrastructure exist to solve this well understood and totally preventable problem. The MHD CLPPP primary prevention approach attracts private owners to enrolling properties in the program. MHD's strategy requires owners to conduct lead-safe maintenance as a condition of grant funding. MHD's current strategy results in a return of \$0.50 to \$1.00 private investment for every MHD dollar spent. Property taxes of properties receiving MHD funds must be current as well as any building inspection orders must be addressed prior to funding. As a result, owners pay off delinquencies and address building inspection orders to become eligible for lead abatement subsidy, which is a benefit to the City of Milwaukee

PROGRAM NARRATIVE

Milwaukee Health Department Lead Based Paint Prevention/Abatement Project (CDGA Housing Providers)

1. **Households/Clients Served:** Describe the specific households/persons to be served, including target low income level and special needs populations, as applicable.

Low-income, very low-income and extremely low income households are the direct beneficiaries of the homes made lead-safe as a result of the monitoring performed by the Lead Risk Assessors of the Milwaukee Health Department (MHD). MHD assures occupant safety through site monitoring and enforcement of HUD's Lead Safe Housing Rule. CDGA-funded housing agencies benefit from the scope of work reviews; site monitoring, final visual inspection and dust wipe clearance tests performed in accordance with federal guidelines. The beneficiaries are qualified by each of the agencies referring properties and projects to MHD for lead safe monitoring.

2. **Outreach:** Indicate all of the methods that will be used to inform eligible persons about your program.

Outreach is performed through the informational meetings held periodically throughout the year for the various housing agency partners as called by the MHD as the need arises.

3. **Activity/Goals and Timelines:** Describe the specific activity to be performed, the numeric goals of the program, method and the timetable for implementation.

The work to be performed is the daily monitoring for lead-safe work practices of federally assisted housing rehabilitation projects. The work includes the reviews of scopes of work and the tracking of projects to assure compliance with federal regulations. Daily inspections of housing rehabilitation projects across the entire CDGA target area are performed by Lead Risk Assessors trained according to federal guidelines and certified by the State of Wisconsin. When applicable, occupant's safety will be reviewed by MHD staff. Informal education takes place at each job site according to the specific needs identified. Lead risk assessors enforce Federal standards for working safely with lead through education, instruction and enforcement.

The goal for the program is to assure lead-safety in 100% of the projects completed by the CDGA- funded housing programs. The actual number of projects is determined by the activity expectations of CDGA for each of the funded housing programs. These numbers are forecast at the beginning of the year in consultation with the CDGA Program Officer. Monthly reports conveying completion activity are provided to CDGA. The activity is ongoing throughout the year due to the continuation of work started but not completed by the various housing organizations. The completion of the project is determined by the housing organization.

4. **Program Outcomes:** The expected long term outcomes from CDGA's funded programs are: **1) Reduce Crime; 2) Increase Property Values; 3) Increase Economic Vitality; and, Improve Quality of Life.** Towards this end, describe the short term and midterm outcomes (results, impact or change expected to come about as a result of your program).

The short term impact of the program is lead hazard reduction through lead-safe work methods, the creation of skilled jobs for disadvantaged business enterprises, and successful completion of dust wipe clearance tests to assure reduction of lead hazards in the home environment. This, in turn, will increase property values, increase economic vitality for workers and improve the quality of life for families residing in these properties. The activity in low-income neighborhoods of the CDGA Target Area will increase the availability of lead-safe and habitable housing. Lead-safe housing improves the livability and marketability of neighborhoods. In the long term, this funding will assist in the eradicating childhood lead poisoning in the City of Milwaukee.

To reach this goal, the City of Milwaukee must accelerate production of lead-safe housing units over the next three years. Each year it is expected that lead poisoning prevalence rates will continue to decline as they have for the last 14 years:

YEAR	Prevalence rate	Numerator (children with lead levels > 10)	Denominator (children tested)
1997	31.9%	6550	20,506
1998	26.4%	5208	19,719
1999	23.5%	4198	17,883
2000	19.3%	3656	18,992
2001	16.5%	3563	21,565
2002	14.1%	3217	22,813
2003	11.3%	2586	22,815
2004	9.8%	2364	24,007
2005	8.3%	1865	22,510
2006	6.6%	1415	21,738
2007	5.9%	1393	23,716
2008	4.8%	1193	24,934
2009	4.4%	1194	27,047
2010	3.4%	1029	30,260

5. If applicable, describe existing collaborations with other agencies, residents and/or other entities which are necessary for performance of the activity.

Collaboration is truly the trademark of the City of Milwaukee Health Department's monitoring of federally assisted housing rehabilitation activity. MHD staff works collaboratively with community based organizations, each housing agency, each property owner and each contractor to assure compliance with federal regulations, while not being directly responsible for the completion of the job.

6. Describe your agency's specific experience in providing the requested services, accomplishments and successes specific to the activity for which you are applying. Include staff expertise.

As of December 2011 15,464 lead-safe housing units have been monitored for lead safe work practices and provided clearance at the completion of lead hazard control/abatement activities. MHD staff has many years of experience of increasingly professional monitoring and implementation of lead safe standards. The Childhood Lead Poisoning Prevention Program is funded independently to perform lead abatement and lead hazard reduction activity by HUD. This expertise is continually shared with CDGA to professionally monitor and assure compliance with federal regulations relating to lead-safe rehabilitation activity.

7. Describe other resources leveraged for the activity for which you are applying.

The MHD's Childhood Lead Poisoning Prevention Program is largely funded by Federal and State grants to assure a comprehensive response to the problem of childhood lead poisoning, which in 2011 included the award of \$4,500,000 in lead abatement funding through the U.S. Department of Housing and Urban Development. The knowledge, capacity and infrastructure exist to solve this well understood and totally preventable problem.

CDBG PROGRAM NARRATIVE
Department of Neighborhood Services

**Code Enforcement Inspectors Targeted Enforcement Program
PROGRAM YEAR 2014**

The Targeted Enforcement Program has three basic activity measurements as per discussions between DNS and CBGA staff. These are:

- Exterior Inspections for the Citywide Housing Coalition and other Community Groups
- Inspections in designated NIDC Targeted Investment Neighborhood (TIN) areas
- "Targeted" Inspections of historically non-compliant properties
- Landlord Training Program

A Special Enforcement Inspector has been assigned to the BI Liaison/Citywide Housing Coalition/Community Groups. The Inspector does "walk throughs" with representatives of these groups, writes up repair orders or processes the necessary paperwork for court action when owners fail to address previously issued unabated orders. This is done in conjunction with the survey process funded by CBGA as the BI Liaison program.

DNS believes the closer link with these groups has benefited neighborhoods and empowered citizens to take stronger actions when it comes to distressed properties. It should be noted that nearly 100% of the effort is focused in the CDBG target area. What's more, the DNS Court Section has been sharing pending court dates with these groups for the opportunity to submit Impact Statements to Municipal Court Judges regarding the negative influences deteriorated structures have on a neighborhood. Unfortunately, at this juncture (court action), owners have failed to respond to formal DNS orders.

It should be noted, however, that over 50% of the properties identified by the community groups affect repairs before any DNS action is needed. Owners ignoring Housing Coalition letters (letters are sent-postage paid by DNS) to make repairs are turned over to the Special Enforcement Inspector for formal action. Approximately 70% of those properties are repaired after formal orders are written.

NIDC TIN areas also receive special treatment from this initiative. Each year, as part of the annual Operation Clean Sweep, DNS Inspectors inspect these areas for abandoned or inoperable vehicles, garbage and debris violations, residential code violations and graffiti. According to MPD statistics, this joint effort that includes MFD, DPW, MPD, DNS, Community Partners and other neighborhood groups has impacted positively in the TIN areas as evidenced by decreased crime statistics following Operation Clean Sweep. Of course, for DNS, this is truly a year round effort as part of the Targeted Enforcement Program.

A substantial number of investment properties are held by a handful of owners that have a reputation of slow compliance or non-compliance resulting in pronounced DNS and Municipal court involvement. This process can lead to costly monthly re-inspections if the court action still fails to produce compliance.

In the preceding situation, four of the Special Enforcement Inspectors are assigned to these owners. The intent is to focus on these owners with a limited number of Inspectors who are aware of negative property management histories to better deal with the compliance situations.

Additionally, DNS has forged an agreement with DCD/RACM regarding In Rem (Tax Foreclosed) properties they sell. The agreement is for a Special Enforcement Inspector to survey the properties scheduled to be sold by the RACM real estate staff. They then share the results of these inspections with prospective buyers, including repair estimates.

In some cases, repair estimates can deem the parcel condemnable, however, RACM staff must also agree that razing is the most feasible avenue for all concerned. In the past, many properties that could have been razed were sold to persons without the means to renovate the structure. We are hopeful this joint effort will minimize that eventuality to the benefit of neighborhoods. RACM staff ensures that buyers fill out Code Compliance applications to satisfy real estate sales Ordinance requirements previously described.

DNS believes that the approaches described above have a positive impact on our neighborhoods and has allowed this department to better manage its responsibilities and focus its resources more efficiently. The closer relationship with concerned citizens and community groups has created a clearer picture of the challenges faced while promoting stability with the housing stock, helping ensure a more positive quality of life in our neighborhoods.

The Landlord Training Program invites existing landlords of residential income property, new residential income property owners, duplex as a starter home, and tenants to attend the program. These households are identified through the database created by D.N.S.'s Property Recording Ordinance, MPROP and the database of the Tax Assessors Office. Community Based Organizations will provide us with a list of names and addresses of landlords to invite to the program from their areas.

Currently there are 12 banks that require or strongly encourage clients who want an income property mortgage loan to attend the program. Section 8, for the City of Milwaukee, requires completion of the program for landlords who want to participate in Section 8. Both of these groups are a referral source for the program. NIDC requires attendance and certification from the Landlord Training Program for anyone participating in the Rent Rehab., CDBG, and Home funds.

The Landlord Training Program is a requirement for purchases of duplexes for many homeownership initiatives, including:

- * First-time homebuyer, affordable mortgage programs by many Milwaukee-area banks
- * Fannie Mae and Freddie Mac "My Community" and Community Gold" mortgage initiatives
- * State of Wisconsin "HODAP" downpayment and closing cost grant program
- * The City of Milwaukee's American Dream Downpayment Initiative (ADDI)
- * The Chicago Federal Home Loan Bank Affordable Homeownership Program subsidies (AHP)

In 2012 the Landlord Training Program held 19 training sessions. Each session is 5 hours long and comes with a 100-page manual. The program for 2012 trained 741 people.

A schedule is developed and made available to numerous sources, through emails, newsletters, posted information on the City of Milwaukee's Home Page, and targeted mailings. The program is also available through the public library system on DVD and videotape. These reproductions are outdated and our supply has dwindled.

The Landlord Training Program continually seeks to improve and stay relevant. We have an evaluation that landlords complete immediately after the presentation. The data collected from these evaluations are

tabulated for our information and for numerous reporting requirements. This post evaluation also seeks information from landlords regarding the census tract location of their rental properties. This information is collected and shared with our reporting agency.

The Landlord Training Program further does a 6-month follow up evaluation with past attendees. This data is tabulated and the results are noted in our various reports, information pieces available to other municipalities, and for further improvement to the program.

The Landlord Training Program is an important part of the City of Milwaukee's crime prevention efforts. The Landlord Training Program also provides tenant/landlord law training for new police recruit classes, as a problem-solving tool to be used in the neighborhoods.

The Landlord Training Program, in the past, has assisted other organizations and City Departments to get the "word" out on their programs. For example we have assisted S.D.C. "The Energy House" identify landlords in certain zip codes whom may be able to take advantage of their weatherization programs. We have assisted the TIN/NIDC in identifying and inviting landlords in the TIN areas to our program.

We have enlisted the assistance of US Bank, Select Milwaukee, Southside Organizing Committee (SOC), the Milwaukee Police Department, North Shore Bank, and a private attorney to help us provide the program in Spanish.

The program also provides assistance to the Common Council members, the Mayor's Office, the police department and their Nuisance and Drug Abatement efforts, the Health Departments Lead Abatement program, Municipal Court referrals, the Anti-Graffiti program, various other city departments, individual citizens and community groups, in their crime prevention efforts. Further, the program receives numerous calls seeking help and information regarding rights and responsibilities from landlords, tenants, the Assistant District Attorneys working out of the Milwaukee Police District Stations, and other citizens.

The Landlord Training Program has also assisted Community Development Block Grant address concerns raised in "The City of Milwaukee Analysis of Impediments to Fair Housing Report" dated August 2005, submitted by Metropolitan Milwaukee Fair Housing Council. The Executive Summary of that report stated, "The City should continue to include MMFHC fair housing presentations as part of its citywide training for rental housing providers."

The Landlord Training Program has worked in collaboration with the Metropolitan Milwaukee Fair Housing Council in previous years. MMFHC has made presentations at our Annual Refresher Program. This provided an opportunity for landlords and property managers to learn more about the fair housing law. The Landlord Training Program will continue to provide information on Fair Housing throughout the presentation. Currently, this program is the only city agency providing this important information to the landlords, tenants, new owners, and the police department..

The Landlord Training Program has been in existence since June of 1993. To date we have trained 22,905 landlords representing over 315,178 rental units.

The program has won numerous prestigious awards including; the "1995 Innovations in American Government" – a program of the Ford Foundation and the Kennedy School of Government at Harvard University- Semifinalist. In 1995 the Institute for Real Estate Management awarded the program their "Education Award". In 1996- Public Policy Forum awarded the program their "Innovation Award for Large Government Units". Further, there have been numerous published articles that have appeared in the *Wall Street Journal*, *Public Policy Review Magazine*, and *Governing Magazine* covering the City of Milwaukee's Landlord Training Program.

CDBG PROGRAM NARRATIVE
Department of Neighborhood Services

NEIGHBORHOOD CLEAN-UP PROGRAM
PROGRAM YEAR 2014

This program is aimed at reducing the amount of garbage and debris that is illegally placed and littered on private property. The program also targets nuisance vehicles that constitute health and safety threats and provides services throughout the City. The Department of Neighborhood Services becomes aware of the presence of debris nuisances and nuisance vehicles in a variety of ways including:

- Aldermanic Service Requests
- Citizen complaints (usually telephonically)
- Referrals from other City agencies (Sanitation, Police, et al)
- Referrals from non-profit community groups
- Inspector initiated surveys of neighborhoods (alley or block surveys)

DNS Nuisance Control Officers conduct inspections to determine if a debris nuisance or nuisance vehicle exists (as defined in the Milwaukee Code of Ordinances). When a debris nuisance is substantiated, the violation is documented on an order to correct conditions. A copy of the order is posted on the house so the resident or owner has an opportunity to take immediate action. Another copy of the order is mailed to the owner of record. The inspector will also attempt to telephone the owner to advise that a violation exists. The purpose for using a variety of communications is to achieve voluntary compliance with the order by the resident or owner. Voluntary compliance is achieved in roughly 75% of the debris orders issued by DNS.

In instances when voluntary compliance is not achieved at the reinspection (about a week from the initial inspection) the inspector documents the condition of the property with photographs and refers the debris nuisance for clean-up. The violations are packaged into geographically similar groups and are sent to Sanitation for abatement whether by sanitation or contractor. The direct clean-up charges along with an administrative charge (to cover the City's costs) are applied to the tax rolls.

The process of addressing nuisance vehicles is very similar to that of clean-up orders. The differences are that instead of posting a copy of an order on the house, the vehicle itself is posted by placing a placard directly on the vehicle (usually a window). A written attempt is also made to contact the vehicle owner using the Vehicle Identification Number (VIN) or license plate.
