

## 707 E Brady St. Narrative:

A short time after the building at 707 E. Brady street was erected in 1890, our family arrived on the east side of Milwaukee from a small town in the coastal hills of Sicily. Our mothers, along with their siblings, grew up off of Warren and Brady and attended St. Hedwig's for grade school and Sunday mass. We not only have a deep rooted family history in the Brady street neighborhood, but also have a profound respect for the history of the neighborhood, and intend to exhibit that in all of our plans for the building. 'Brady's Corner' will function as 3 separate entities inside of one building. On the first floor will be a neighborhood diner that we feel is missing from the neighborhood. Upstairs will be a 24 hour European style cafe that was inspired by our families recent trip back to Italy. Where, we finally got to see the place our family's history began long before their voyage across the Atlantic, that eventually ended them up on Brady street. And finally, out of the back kitchen will be a service window that serves butterburgers and fries to the many patrons of Brady street that are on foot, and bring some sidewalk eats to the already vibrant area. We hope to revitalize the main corridor to Brady street and have our end of the street resemble the bustling north end of Brady and Farwell. We hope to have a community space that operates in conjunction with the residents of the neighborhood while maintaining Brady streets archaic charm that has stood the test of time. We will always honor the building, and the neighborhoods past as it is our own history as well.
