Subject: Data Center at Midtown concerns

Some people who received this message don't often get email from ewil81@icloud.com. [Learn why this is important](#)

To Whom It May Concern:

To Whom It May Concern,

As a concerned citizen and member of this community, I strongly oppose the construction of a data center in the heart of our neighborhood. Our community deserves investments that bring people together, strengthen families, and support the future of our children, not projects that may create division, stress, and potential health concerns.

Instead of placing a large industrial-style data center in our area, I encourage city leaders and decision-makers to consider building a new community center that would directly benefit our youth and families. Our children need safe spaces for learning, recreation, mentorship, after-school programs, and community engagement. A community center would provide positive opportunities that uplift and unite residents rather than introducing uncertainty and concern.

Many residents are also worried about the possible environmental and health impacts associated with data centers, including noise pollution, increased energy usage, air quality concerns, and potential long-term effects on public health. We should not place our babies, children, elderly residents, and families at risk for possible underlying health conditions simply for corporate expansion.

Our community should not be treated as a location for projects that may negatively impact the quality of life for the people who live here every day. We deserve thoughtful development that prioritizes the health, safety, and well-being of residents.

I respectfully ask local officials to listen to the voices of the community and reconsider these plans. Let us invest in resources that truly support and strengthen our neighborhood for generations to come.

Sincerely,

Ester Wilson
