Good afternoon,

Due to my work schedule, I am unable to attend the public hearing. Here is my testimony:

I decline proposal to build a data center near the midtown area. My fiancé and I, along with our 2 kids, live just 10 minutes away from this region. I truly believe this does not, in any way, help our community at all due to its harmful effects on the environment (pollution, loud noises & high water and electricity usage). Because of these centers using high amounts of energy and water, this can bring about more financial stress and water shortages in an already predominately low in-come area. I should mention as well that the City of Milwaukee is extremely high in local and property taxes, which is perpetuating the impoverished neighborhoods in the north side area.

Also, just in the past few years, we have had multiple community stores close, such as Pick n' Save, Walmart, and Walgreens. There are multiple streets that have horrific conditions, whether it is pot holes or just loaded with garbage everywhere. MPS is a failing school district and there are concerns with administration mismanaging the money flow, contributing to the conditions; this is supposed to be where the majority of our taxes go to.

There are a lot more programs and resources the community could use that can benefit us better than a data center. I hope you guys take everything I said into consideration and make the right decision. Thank you so much for listening.

Sincerely,

Daysia
