Steering & Rules Committee

Re: Local Business Action Team

Committee members:

The following is a summary of the department's accomplishments to date in response to the LBAT recommendations.

- Significant resources have been, and continue to be, expended by the Department in the development of the Land Management System which will serve as the vehicle for several of the listed DNS Service Delivery Improvements such as electronic plan submittal, online project tracking (the current Plan Tracking System already allows submitters to check the status of their plan review online), online certificate of occupancy applications, and inter-department management and tracking of development projects.
- The Development Center has provided space for the Health Department to establish a physical presence at the Development Center. Minor modifications to that space are being initiated by the Health Department to accommodate their needs.
- The Development Center continues to reach out to other City agencies to bring appropriate resources to bear to provide useful and comprehensive information to developers and business owners.
