- New Grant
- Grant Continuation
- Change in Previously Approved Grant

Previous Council File No. 171198

Previous Council File No.

Project Title: 2019 Consolidated Contract- Lead Detection

Grantor Agency: State of Wisconsin Department of Health Services

Grant Application Date: N/A-Continuation

Anticipated Award Date: January 2019

Please provide the following information:

1. Description of Grant Program/Project (Include Target Locations and Populations):

The Lead Detection Grant funds supportive, comprehensive and coordinated service delivery to lead-poisoned children and their families. This grant supports nursing case management, lead inspection, hazard identification and abatement technical services.

2. Relationship to Citywide Strategic Goals and Departmental Objectives:

The Lead Detection State of Wisconsin grant assures the promotion of safe and healthy homes for children in Milwaukee. The investigation of lead poisoning and medical case management assures that children that are lead poisoned are identified early and receive the interventions needed for healthy child development.

3. Need for Grant Funds and Impact on Other Departmental Operations (Applies only to Programs):

This consolidated contract funds positions and services needed to sufficiently administer the Home Environmental Health program. While some City funds are currently used to support some of these initiatives, they are considered as match funds for the grantor. These functions could not be achieved without the grant funding supplementing the City funds.

4. Results Measurement/Progress Report (Applies only to Programs):

Lead Detection Grant:

- Monitoring of all childhood lead level results for every child in the City of Milwaukee.
- Outreach and education to families of City of Milwaukee children with capillary or venous blood lead levels $\geq 5\text{mcg/dL}$
- Comprehensive public health nursing case management for all City of Milwaukee children with venous blood lead levels $\geq 20\text{mcg/dL}$ (or have two venous blood lead levels $\geq 15\text{mcg/dL}$ at least 90 days apart).
- Environmental lead hazard investigations for all City of Milwaukee children with venous blood lead levels $\geq 20\text{mcg/dL}$ (or have two venous blood lead levels $\geq 15\text{mcg/dL}$ at least 90 days apart).

The department is on pace to follow up with more than 200 children with completions of full investigations (nurse case management and environmental investigation) in 2018. However, that is but a fraction of the total 2800+ children who are expected to be found with elevated blood lead level.

5. Grant Period, Timetable and Program Phase-out Plan:

The grant period for the Consolidated Contract Lead Detection Grant is January 1, 2019 through December 31, 2019.

If funding was not received, the positions paid by this contract would be eliminated and the ability of the Health Department to provide these services would be greatly diminished.

6. Provide a List of Subgrantees:

None.

7. If Possible, Complete Grant Budget Form and Attach

See attached.
