Hello,

Hope your day is going well. As a resident of Milwaukee, I would appreciate providing feedback on the proposed data center at Midtown. I strongly oppose putting in any data centers. These data centers are an exploitive overreach of big tech that wastes resources, energy and they pollute. There's no way we can keep up with the amount of water they consume and it is incredibly sad Wisconsin has been entertaining the idea of them destroying our Great Lakes.

Plus, they are driving up tech costs on things like hard drives which is making my small business incredibly expensive to fund. A 2TB hard drive used to cost about \$200, now because of the data center demand that same hard drive costs \$1000K. Data centers do not create jobs and are not worth exploring in the state of Wisconsin.

Please vote no on the proposal and keep data centers out of Milwaukee.

Thank you,

Eric Arsnow
