

**MEMORANDUM**

**To:** Honorable Members, Public Works Committee  
**From:** Jeff Osterman, Legislative Reference Bureau  
**Date:** June 17, 2008  
**Subject:** PROPOSED SUBSTITUTE "C" FOR FILE NO. 080195

+++++

Proposed Substitute C for File 080195 differs from Proposed Substitute B in the following ways:

1. The following language is added to the street-width design standard for streets designed, constructed or reconstructed by the City:

*The commissioner shall employ street design standards to minimize street pavement width and to provide only the pavement width necessary to ensure safe movement of traffic.*

2. The area between a sidewalk and a curb may be paved with permeable paving, stone, brick or concrete pavers, but not with bituminous material (i.e., asphalt).
3. References to "queuing lanes" are eliminated.
