RE: C.I. File No. 1048—2023-518 Reconsideration of decision denial

Dear Committee Members:

The denial of my hearing with the appeal for Lead Lateral was a violation of my rights to due process. ^{wa} Abruptly interrupted during my testimony and the Committee members were not allowed to ask me questions thoroughly. The lack of fairness was clear based on the previous case proceedings. Community members, at the hearing, were able to present their cases without interruption and were allowed to answer questions. The Committee members were able to thoroughly ask questions without being interrupted or shut down from speaking.

By cutting me off, it prevented the Committee from having full testimony that would give them the opportunity to make an informed decision related to this case. Being a Common Council Committee member requires balance of interest for the City of Milwaukee and the interests of its constituents. Disregarding the concerns and rights of a resident and a small business does not show balance; especially since this small business, located on Center Street for over 40 years, is an icon in this community and the City of Milwaukee.

I am requesting a review of the decision and allow the due process to take place at the next hearing and/or appeal the denial decision made on May 13th 2024.

Respectfully Submitted

Ibiyemi Akua Oladunjoye Ogboni
