Dear Christopher,

Re: Townsend School – Milwaukee Public Schools

Graham Architectural Products is a manufacturer of architectural and commercial-grade aluminum windows and doors. We specialize in recreating historical windows of any size and shape using modern, energy-efficient designs and materials.

Graham is capable and willing to create custom shapes and profiles as needed to match specific jobsite conditions. While we offer over a hundred standard panning shapes to replicate the original brick mould, many projects will require custom extrusion dies to be cut. Our panning systems are factory fabricated to be field assembled to ensure the highest level of quality possible. We have provided you with a custom 3D print of the job specific panning shape to confirm we can match the existing Townsend profile.

It's our experience – broadened over decades – that enables us to see your vision, and it's our expertise that allows us to bring it to life. We've built our reputation one custom-engineered solution at a time over a wide variety of architectural applications. As a result, we are able to resolve your most difficult challenges with beautiful, functional, energy efficient windows, doors and window wall systems that draw upon hundreds of models and accessories and, yes, more than a bit of human ingenuity to deliver the solution that is uniquely yours.

We are excited to work with you on the Townsend School project and are confident we can provide you with the best solution possible.

Regards,

A handwritten signature in black ink that reads 'Jim Barbour'.
