Tim + Carlen,

Existing historic Windows:

Please find attached drawings of the original windows to be removed. These windows are wood construction, single hung windows. They are square top with no arches in the area we are modifying. There are also storm windows that were added later. We did not include the storm windows as they are not historic to the building.

Images of Windows:

I have attached images of the existing wood window details close up. Again these images prove the wood construction and style of window.

Original Drawings of Windows:

Attached are details from the original drawings calling out the wood windows. I presume you still have the full set of original drawings, but I will resend the full original drawings in a separate email for your review.

Proposed concept:

See attached exterior elevations Sheet A2.0. To be consistent with the original architecture of the portion of the building we are tying into, we would propose using a wood window with a double hung look and no arch. Obviously we would still plan to provide additional drawings and shop drawing in the future, we just want to make sure we are proceeding with staff recommendations.

Thanks,

David Vanden Avond AIA
