Subject: Strong Opposition to the Milwaukee Midtown Data Center

Some people who received this message don't often get email from morgan.popa@gmail.com. [Learn why this is important](#)

My name is Morgan Popa and I live on the upper east side of Milwaukee. I am writing in today to STRONGLY oppose the data center being proposed on North 60th Street.

It should be no surprise to you at this point that the majority of US citizens are opposed to data centers being build in their communities, and honestly the City of Milwaukee should not even be considering this proposal if it cares at all about protecting and improving the quality of life of the people here.

The data center will bring noise pollution, air pollution, light pollution, higher energy bills, higher water rates, decreased property values, danger to our precious Lake Michigan, and will only increase the already crippling environmental and financial strain caused by big tech greed that normal working class people bear the brunt of.

We don't need more AI. We don't want more AI. We need investment in our communities. Why not build a grocery store, a youth center, green spaces, ANYTHING that benefits the human beings who live here instead of continuing to line the pockets of the multi-millionaires and billionaires?

KEEP DATA CENTERS OUT OF WISCONSIN. PLEASE PLEASE PLEASE DO YOUR JOB AND PROTECT YOUR CITIZENS.

And know that if you approve this data center, you will lose the support of the entire city and we will vote you all out.

Thank you,

Morgan Popa
