EXTENDED PYRAMID

Wasco's extended pyramid residential skylighting system gives you a custom look at an affordable cost.

A lightweight system for flat roofs providing spans of up to 5' wide by unlimited length. Curb-mount design using site-built curbs enables unlimited applications on both pitched and flat roofs. The thermally-broken aluminum frame ships ready for field glazing.

ABOUT WASCO SKYLIGHTS

At Wasco Skylights, we are dedicated to providing our customers with energy efficient skylights in a wide variety of colors and styles. Our commercial and home daylighting solutions help you save on energy costs for your home or business, while brightening the environment with plenty of natural light. In addition to providing environmental benefits, our products are designed to improve the aesthetics of any building and add a stunning design element to your home. Our home skylights are available in many styles, which allow our customers to easily find the right skylight for a flat or pitched roof. Some of the features offered in various pyramid and plastic dome skylight designs include hurricane resistant glass, motorized venting systems, temperature controls and rain sensors.
