Subject: Milwaukee River Greenway Corridor Study - file #070124

Attention City Plan Commission:

I strongly support the study for the creation of a Conservation Overlay Zone for the Milwaukee river valley area from CAESAR'S PARK (not just from the former North Ave. Dam). I believe with the pressure of ever encroaching development especially from a planned condo project at the entrance of Caesar's park along the bluff line will have a negative impact on wildlife and destroy natural habitats. Caesar's Park is like a little nature preserve. Bringing in heavy equipment and driving pylons to build condos – will destroy the delicate animal ecosystem that live or frequent the Park and river valley.

If Caesar's Park has already been included in the study I applaud you for your foresight – if not I strongly recommend that it be included.

Thank you.
