Hi Tim,

In regards to the COA for 2581 N. Downer Avenue:
Replacement units at 2581 N. Downer (existing wood double-hung units) will be Marvin Ultimate G2 double-hung windows with insulated thermal panes. The configuration will match known historic conditions. At units which historically had divided lights, simulated divided lights with spacer bars will be utilized (SDLs).

Please confirm that this will be sufficient for achieving approval.

Thanks,
Kate Bissen
