Re: Proposed Ranking Criteria for Capital Projects

I would like to move forward with establishing criteria that the Capital Improvements Committee will use for evaluating proposed capital improvement projects. To that end I have attached current and historical information relating to project ranking. The document also contains information which could form the basis for discussion regarding our new criteria.

Your insight and input will be greatly appreciated. Comments and suggestions received by May 21 will be incorporated into a single draft for review at the next Committee meeting.
