Subject: ABSOLUTELY NO TO DATA CENTER

Some people who received this message don't often get email from noelletherogers@gmail.com. [Learn why this is important](#)

Good evening,

Since the hearing is in the middle of the day on a Monday, I would like to request that you do not seriously consider allowing a data center to be built in the middle of the city. This is actual insanity. I am disgusted that data centers are even a thing that exists anywhere, let alone potentially in the middle of our city.

Data centers are dangerous to our health and our environment. Between the air pollution, noise pollution and the amount of fresh water these data centers guzzle down, there is no benefit to our community. Everyone's energy prices are already on the rise and this could result in an unmanageable price increase for everyone who is already struggling to pay their bills.

Billionaires and their corporations need to be put to a stop and we cannot allow them to infiltrate our communities with these destructive projects seemingly unchecked.

We love our city. We love our state. Our nature resources like the air we breathe are being destroyed by continuing to allow data centers to be built without the voice of the people in the surrounding areas.

Thank you,
A very concerned Milwaukee resident, Noelle.
