

## Climate Plan Community Dashboard

The Community Dashboard, powered by [ClimateView](#), is now available at **Milwaukee.gov/ClimatePlan**.

The dashboard shows emissions targets for the geographic bounds of the city of Milwaukee and progress based on commonly-used international “transitions” that were adapted based on Milwaukee’s local plan. The Municipal dashboard shows a subset of those community emissions for municipal operations, only. Click on each dashboard to further explore Milwaukee’s plans and targets.

We welcome community feedback before extending the contract for this dashboard into the future.
