Project/Program Title: Great Cities Grant – Stormwater Parking

Grantor Agency: US Environmental Protection Agency

Grant Application Date: 2005   Anticipated Award Date: 2005

1.   Description of Grant Project/Program (Include Target Locations and Populations):

Stormwater Parking aims to reduce polluted stormwater runoff into Milwaukee's combined sewer system from selected city property through the use of green best management practices (BMPs). Stormwater Parking will increase the pervious surface of a city parking lot located at 365 W. Ward Street through the use of permeable pavement and rain gardens.

2.   Relationship to City-Wide Strategic Goals and Departmental Objectives:

Stormwater Parking will reduce polluted stormwater runoff into Milwaukee's combined sewer system from select city property. As concluded by the Mayor's Independent MMSD Audit Committee, too much stormwater enters the MMSD combined sewer system during major wet weather events which overwhelms the system and causes an unacceptable level of overflows. Pursuant to the Audit Committee recommendations, Stormwater Parking targets reductions in stormwater runoff from a city parking lot (completely impervious) through the use of pervious pavement and rain gardens.

3.   Need for Grant Funds and Impact on Other Departmental Operations (Applies only to Programs):

NA

4.   Results Measurement/Progress Report (Applies only to Programs):

NA

5.   Grant Period, Timetable and Program Phase-Out Plan:

Grant period beginning October 1, 2005 through September 30, 2006.

6.   Provide a list of Subgrantees:

The City will contract with an environmental engineering firm with experience in green parking BMPs including permeable pavement and rain gardens.

7   If Possible, complete Grant Budget Form and attach to back.
