Property Address: 532 N. 90th Street

We recently had a backup in our basement which required a plumber to snake the line. This ended up being unsuccessful because water remained in the line and wasn't draining. The plumber recommended we get the line televised in order to determine the problem, which we did. Because of standing water in the line, the televising was unsuccessful. It was then recommended to have the line jetted, which we did, then televised again afterwards, which was again unsuccessful. The camera was still underwater at 90' from our basement clean out, and he was unable to determine why water continued to flow back into our lateral. This company suggested we call Milwaukee DPW to check the city main.

You came out on Friday, June 25th and found a very large clog in the main, which was jetted and cleared. At that point, the standing water in our lateral drained immediately. After televising, your team determined that significant roots were still in the city sewer main, which we were told they will be returning soon to clean out.

We're writing this letter to request reimbursement for expenses we incurred because of a problem that ended up being in the city sewer main, not our lateral.

ABC Sewer	\$ 119.00
Sewer Ninjas	\$ 49.00
Plugged Pipes	\$ 844.00
Total	\$1,012.00

We have had numerous basement drain clean outs over the years of owning this building, however, we'd appreciate reimbursement for this particular situation.

Thank you very much,

Ed Wiener
