Subject: Support Mural on Railway Exchange Building

> I write in support of the mural proposed for the Railway Exchange Building. Its message communicates support of the historical movement for equality and voters rights. The message should not be controversial. Some people's complaint about the selection of this particular artist — a world-renowned one at that— would seem beyond the purview of this commission. In addition, this is not a public project. No public money is being spent on the project. Many (all?) of us would also support a second project created by local artists, support by public monies. But, that is not this project. This project is designed to be painted before the DNC convention on private property, to help put Milwaukee on the national artistic map.
