Special Representative of the Secretary-General and Chief Executive Officer

January 15th, 2015

Dr. David Danielson
Assistant Secretary for Energy Efficiency and Renewable Energy
Office of Energy Efficiency & Renewable Energy
Forrestal Building
1000 Independence Avenue, SW
Washington, DC 20585

Dear Dr. Danielson:

The Sustainable Energy for All (SE4ALL) initiative was launched by UN Secretary General Ban Ki-moon to foster partnerships across government, corporations, finance and other institutions to make sustainable energy policy and solutions a reality. SE4ALL's objectives include universal access to energy, increased renewable energy, and energy efficiency. At the 2014 UN Climate Summit, SE4ALL launched a new Building Efficiency Accelerator to help city, state, regional and national governments speed up adoption of policies that promote energy-efficient buildings. National and municipal governments launching the partnership include Milwaukee (USA), Copenhagen (Denmark), Lima (Peru), Mexico City (Mexico), and Toyama (Japan). Among the business partners supporting the process are Johnson Controls, Velux, Philips and United Technologies.

Using various resources developed by the US Department of Energy, Milwaukee's proposed *Location, Location, Efficiency!* program will help hundreds of commercial buildings become more efficient. The SE4ALL network can then serve as a platform to share the lessons learned to our partners across the globe. Milwaukee can thus be an example to the world to showcase scalable solutions to transform the energy efficiency markets

Sincerely,

Dr. Kandeh Yumkella
Special Representative of the Secretary-General & CEO, SE4ALL
