Hello, I'm a concerned citizen writing in regards to the data processing center being discussed on May 18th.

We have seen in many other parts of the country these data centers pollute water systems. As a proud Wisconsinite and Milwaukee resident I believe we have a duty to protect our Great Lakes, and all bodies of water that are invaluable to us and our precious ecosystems.

These centers have also proven to jack energy prices sky high, with many Milwaukee residents already struggling with energy and other cost of living crisis it would push even more into poverty and paycheck to paycheck living.

Will there be a thorough impact study done? How will Milwaukee residents benefit from a data processing center? I beg you do not take these decisions lightly, as it will have deep, long lasting impacts that reverberate far outside of Milwaukee.

Some reading material if you're interested about the dangers of data centers.
