Common Council
City of Milwaukee

Subject: Ordinance Relating to the Sewer User Charges

Dear Honorable Members:

We are submitting the attached resolution for introduction at the October 15, 2002 Common Council meeting. This file restores the method of billing residential sewer users on a percentage of consumption each billing period, rather than on the basis of winter quarter consumption or actual water consumption, which ever is less. The percentage of consumption method would recover both the Milwaukee Metropolitan Sewerage District's sewer user charge and the City of Milwaukee's Sewer Maintenance local sewerage charge on the basis of 95.5% of actual consumption. This file has no fiscal impact.

This file relates to adoption of the 2003 budget, as this file would need to be adopted to implement the sewer fee as proposed in the 2003 Proposed Plan and Executive Budget.

If you have any questions about this file, please contact Mr. Eric Pearson of my staff at x8554.

Sincerely,

Laura J. Engan
Budget and Management Director
