Importance: High

I made a visit to the site and I see that you have installed the glass block windows. They face the street and are clearly visible from the sidewalk. Why were they installed?

Good Afternoon,

I received your application for a boiler and install of glass block windows at the above address in the North Point South local and national register historic district. Glass block windows are typically not permitted but there is a possibility if they are not visible from the street and do not significantly alter the design of the building. I'm not sure the proposed windows will meet either of the criteria. Could you send a photo? I might be able to get out there tomorrow sometime to have a look, but I still need to know which windows on the north side you are talking about? Or are there only two basement windows on that side?

Thank you.

Regards,

Paul Jakubovich
