**Subject:** Reject the Midtown Data Center Plan

Some people who received this message don't often get email from [evan.t.foht20@gmail.com](mailto:evan.t.foht20@gmail.com). [Learn why this is important](#)

Hello,

Until there are laws, regulations, and enforcement of such laws and regulations, that hold these corporations accountable for every action they take and every impact that these data centers have on the surrounding community and environment, The only reasonable response to any datacenter proposals is to reject them.

Do not make the governing body of the City of Milwaukee a blight to its very citizens it is support to represent and support. In an age where government bodies continuously refuse to hold corporations accountable for their action, those actions that always harm society at an economical level, community level, and environmental level for the sake privatized profit, it is your duty to prevent them from gaining any further footholds within this city.

Thank you for your time and consideration,

Evan Foht
