Vehicle Valuation Methodology Explanation

WorkCenter Total Loss was built through a joint partnership between J.D. Power and Associates vehicle valuation division Power Information Network (P.I.N.) and Mitchell International, a leading provider of claims processing solutions to private passenger insurers.

WorkCenter Total Loss produces accurate and easy-to-understand vehicle valuations via this five step process:

Step 1 - Locate Comparable Vehicles

Locate vehicles similar to the loss vehicle in the same market area. WorkCenter Total Loss finds these vehicles in AutoTrader.com, Cars.com, Vast.com and directly from dealerships.

Step 2 - Adjust Comparable Vehicles

Make adjustments to the prices of the comparable vehicles. The comparable vehicles are identical to the loss vehicle except where adjustments are itemized. There are several types of comparable vehicle adjustments

- Projected Sold Adjustment - an adjustment to reflect consumer purchasing behavior (negotiating a different price than the listed price).
- Mileage Adjustment - an adjustment for differences in mileage between the comparable vehicle and the loss vehicle.
- Equipment- adjustments for differences in equipment between the comparable vehicle (e.g. equipment packages and options) and the loss vehicle.

Step 3 - Calculate Base Vehicle Value

The base vehicle value is calculated by averaging the adjusted prices of the comparable vehicles.

Step 4 - Calculate Loss Vehicle Adjustments

There are four types of loss vehicle adjustments:

- Condition Adjustment:
Adjustments to account for the condition of the loss vehicle prior to the loss.
- Prior Damage Adjustment:
Adjustments to account for any prior damage present on the loss vehicle prior to the loss.
- After Market Part Adjustment:
Adjustments to account for any after market parts present on the loss vehicle prior to the loss.
- Refurbishment Adjustment:
Adjustments to account for any refurbishment performed on the loss vehicle prior to the loss.

Step 5 - Calculate the Market Value

The Market Value is calculated by applying the loss vehicle adjustments to the base value.
