5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached.

We intend to keep the original 1868 St. James Episcopal Church including the apse. This may require some maintenance or repair, but the current historic character will be retained and protected. The parish house addition that was built in 1899 will be removed as it cannot be configured for accessibility as required by the building code for construction projects with a change of use. The north facade of the parish house will be retained and serve as an entry portal. This portion of the facade will be stabilized as a transition feature between the historical building and the new addition beyond.

The new addition is proposed to be constructed in the place of the balance of the parish house to provide the adequate accessible facilities for the historical church building as well as the new commercial spaces in the addition. This will allow matching the level of the existing church for accessible access and routes though the building.

The church is proposed to be used as an event venue. Support services for this space will be located in the addition which will also host a second event venue taking up most of the existing parking lot east of the existing parish house.

The addition will have a light masonry base similar in color tones to compliment the material of the church. The masonry will carry up the North facade of the addition. The courtyard will be developed as an extension of the event venues as additional outdoor gathering space. The remaining portion of the addition will be programed as housing and provide a backdrop to the church as to not detract from it's historic character. The exterior wall panels will be a flat panel in a color similar to the St. James Apartment building adjacent to the site and on the opposite side of the court yard as the Historic Church.
