To the Public Improvements Committee

Subject: Common Council Resolution File Number 040618

Dear Honorable Members:

The Wisconsin Department of Transportation (WISDOT) has scheduled the rehabilitation of the Marquette Interchange (MQI) within the Central Business District of the City of Milwaukee for the period from spring 2004 through the late fall 2008. The project is to be accomplished in 5 major contracts, being the Clybourn Advance contract (CLAC), North Leg contract, West Leg contract, South Leg contract and the Core contract. The Department of Public Works has assisted the WISDOT in the design and construction phasing of the contracts to best meet the needs of the citizens of the City and the Region as a whole and has worked diligently to minimize costs. The reconfiguration/rehabilitation of the interchange will, however, result in extensive alterations to City Water, Sewer, and Communications facilities. State Statutes §84.295 (4m) requires that the City accommodate these types of Freeway projects and that the WISDOT pay 90% of the cost for alterations to Municipal facilities with the remaining 10% being the responsibility of the affected municipal jurisdiction. The total estimated cost for alterations to City Water, Sewer, and Communications facilities is \$12 to \$14,000,000.00 of which the City will be responsible for approximately \$1.2 TO \$1.4 million dollars over the 4-plus year life of the rehabilitation project. In order to be reimbursed for the 90% WISDOT share of the work, it is necessary for the City to enter into Utility Agreements which define the work and the process for cost sharing on the project. The WISDOT has provided the City with the necessary agreements for the West Leg, being the third of the five contracts to start in February, 2005.

City utility work associated with the CLAC has been estimated to be as follows:

Water Works \$494,389.59 of which the City share is \$49,438.95

Sewer facilities \$76,606.38 of which the City share will be \$7,660.64

Conduit facilities \$305,000 of which the City share will be \$30,500

Cable facilities \$298,176.58 of which the City share will be \$29,817.66

City utility work associated with the North Leg contract has been estimated to be as follows:

Water Works \$1,447,395.09 of which the City share is \$144,739.51

Sewer facilities \$7,065,307 of which the City share is \$706,530.76
Conduit facilities \$476,000 of which the City share is \$47,600
Cable facilities \$809,956.74 of which the City share is \$80,995.67

To the Public Improvements Committee
September 2, 2004
Page 2

Agreements for this work have been addressed under separate cover and Common Council Resolution File Number 040409.

City Utility work associated with the West Leg contract has been estimated to be as follows:

Water Works \$24,000.00 of which the City Share will be \$2,400.00
Sewer facilities \$325,883.48 of which the City share will be \$32,588.35
Conduit facilities \$8,625.00 of which the City share will be \$862.50
Cable facilities \$10,000.00 of which the City share will be \$1,000.00

The Department of Public Works has reviewed the estimates and finds them to accurately reflect the required utility alterations in conjunction with the West Leg contract. As such, we have prepared the attached resolution which, if adopted will allow for the City's participation in the alteration of Water, Sewer, and Communications facilities as necessary to accommodate the MQI West Leg contract and will provide for 90% cost share by the WISDOT. Said resolution will also authorize the Commissioner of Public Works to execute the various agreements as well as take actions as necessary to accomplish the work and will authorize the City Engineer and the Comptroller to make periodic payments and billings in accord with established procedures to properly account for the costs associated with said work. We respectfully recommend adoption of the resolution.

Very truly yours,

Jeffrey S. Polenske, P.E.
City Engineer

Jeffrey J. Mantes
Commissioner of Public Works
