WhyDoYouWantToJoin:

I am interested in joining youth council for several reasons: First, as a student here in the city, I want to advocate for the support of early literacy programs in public schools, since that is something I have seen affecting my peers at the high school level, and I think this issue could be prevented through early literacy support. I am also interested in how youth leadership can shape our involvement in career development-not just through paid internships and apprenticeships, but real, educational, community-building mentorships. As someone interested in statistics and data, I want to see how numbers can translate into real policy changes, especially in today's cost of living crisis. In my neighborhood, the price of housing in my lifetime has increased drastically, and we have seen a shift in the community as a result.
