Subject: Proposed data center in Milwaukee

[Some people who received this message don't often get email from kellie.nimphius@icloud.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Good morning

After hearing about the proposed data center for Milwaukee I wanted to reach out These data centers have been known to cause cancer. They provide little to NO long term jobs for the community. They do irreparable damage to the environment. They pass along energy costs to the community, when we're already struggling with soaring utility bills.

Milwaukee is NOT the place for a data center.

These tech companies do not care about the well being of the humans living in Milwaukee, they care about making another profit. We don't want more FoxxConn level disasters in the area.

We need to stop any data centers from being built Thanks for your consideration A lifelong Milwaukee native who lives and works here, and actually cares about the future, Kellie Nimphius
