

Community Cat Caregivers Program Data: November 1, 2010-October 31, 2011

Category	11/1/2010	10/31/2011	Explanation
Active Participants	20	44	
Active Colonies	19	38	Eight additional colonies are considered inactive because they currently have no cats.
Active Cats	176	219	Cats in the active colonies listed above. We estimate that if female cats in the original colonies had not been sterilized through the Trap-Neuter-Return program, they would have produced 313 kittens by October 31, 2011.
Average colony size	9.26	5.76	
Cats that left their colonies	20	103	Died: 12; Left Colony: 39; Adopted: 52
Active Males	74	94	
Active Females	78	97	
Active Unknown gender	24	28	
Active Male Kittens	13	11	
Active Female Kittens	5	8	
Active Neutered Males	16	58	Rate of neuter increased from 21.6% to 61.7%
Active Spayed Females	21	58	Rate of spay increased from 26.9% to 59.8%
