# HOTSPOT TESTING

## SAFER MODEL

- **Convenience:** offer tests in locations that are a part of daily life - parks, schools, grocery stores
- **Safety:** Reduces need for patients to visit overburdened healthcare facilities, and administer tests with limited face-to-face contact
- **Equity:** Reach communities and populations that do not otherwise have access to healthcare resources or rapid emerging “hotspots”

# VACCINATION PLANNING

- Early Planning
  - Positive outlook, but no defined date
  - Flu Vaccine Operational experience
  - Identifying key strategic partners
  - Identifying key strategic locations
  - Phased distribution approach
