# 1. Introduction

---

## Purpose

The City of Milwaukee Department of Public Works (DPW) is initiating a third Dockless Scooter Pilot Study (pilot) to observe, solicit feedback on, and evaluate the effectiveness of dockless scooters in Milwaukee for the purpose of determining how to best incorporate scooters into the transportation landscape moving forward.

Dockless scooters, as defined herein, means a system of self-service scooters made available for shared use to individuals on a short term basis, which may be rented via a smart-phone app, vendor website, vendor customer service number, or a pre-paid PIN and which do not require structures at permanent, fixed locations where rides must begin and end.

## Goals

### **1. Provide equitable transportation services**

Dockless scooters can be deployed where the need is highest, providing transportation services where other options may be unavailable. Additionally, dockless scooters that accommodate people of varying abilities have the potential to improve access to dockless scooters for a wider customer base.

### **2. Increase transportation options**

Dockless scooters have the potential to reduce reliance on motor vehicles and ride sharing services for short trips, decreasing congestion and air quality impacts. Dockless Scooters may also provide links to public transit, assisting with connectivity and solving the first-mile/last-mile problem.

### **3. Evaluate impacts on access to the public right of way**

Scooter operators must show a commitment to keeping pedestrian ways, streets, and other public rights of way unobstructed by dockless scooters for other street users. Most importantly, dockless scooters must be parked and maintained in a manner that provides a clear path for people walking and maintains access to businesses, residential units, and other buildings.
