Previous Council File No. 000451

Previous Council File No.

Project/Program Title: Lead Poisoning Prevention Grant

Grantor Agency: Centers for Disease Control (CDC) through the State of Wisconsin Division of Health

Grant Application Date: N/A - Continuing

Anticipated Award Date: July 1, 2002

Please provide the following information:

1. Description of Grant Project/Program (Include Target Locations and Populations):

This grant continues to support comprehensive and coordinated services to lead-poisoned children and their families. Services include screening, laboratory analysis, nursing care management, environmental inspections, community health education and program management. The goal of these services is to identify lead poisoned children and to provide services that minimize the damaging effects of further exposure to lead-based paint hazards.

2. Relationship to City-wide Strategic Goals and Departmental Objectives:

Childhood lead poisoning is a major initiative under the Health Department's Maternal and Child Health and Home Environmental Health objective.

3. Need for Grant Funds and Impact on Other Departmental Operations (Applies only to Programs):

Although progress is being made, the scope of the childhood lead poisoning problem in Milwaukee remains greater than national averages. Funding from the CDC will continue to be combined with allocations from the State and City to provide comprehensive and coordinated services to lead poisoned children and their families..

4. Results Measurement/Progress Report (Applies only to Programs):

Detailed program objectives with evaluation components are provided for six program areas within the grant application. Results are measured by monitoring services delivered and evaluating outcomes such as reductions in blood lead levels and decreases in the number of children newly identified as lead poisoned.

5. Grant Period, Timetable and Program Phase-out Plan:

The grant year is July 1, 2002 through June 30, 2003. If this funding is not received, these positions will be eliminated and the ability of the Health Department to provide needed services to lead poisoned children will be greatly diminished. A loss in funding will also compromise the City's ability to advance primary prevention which builds upon these priority services.

6. Provide a List of Subgrantees:

Not applicable

7. If Possible, Complete Grant Budget Form and Attach to Back.
