Dear Linda Elmer, I didn't realize that the hearing on July 3rd would deal specifically with a height variation. It is not my wish to derail a development because of dimensions alone. Since that is what this hearing specifically addresses, I am not opposed to a variation of massing. I'll repeat what I wrote earlier and that is there needs to be a master plan for the Walker's Point/5th Ward river frontage and surrounding neighborhoods. I am not opposed to tall buildings if they fit into a future masterplan. There has been a mish-mash of cheap looking architecture built on the south side of the river and that is what should be avoided. Quality architecture of varying dimension is what is desired. Since the hearing is specifically about the height, I do not object. Please forward this to committee members. Thank you
again, Douglas Quigley
