Re: Reimbursement for Water Damage done by City of Milwaukee Water Works Department

On Thursday, March 21st, I discovered water in the basement of my rental property at 3438 N. 39th Street. There was 4 – 6 inches of water all over the basement floor. I've had several issues with water in my basement since the water meter in the street was changed. Usually when the water comes in it would eventually recede but this time the water did not. I contacted a Badger Underground and they found that the problem was in the same place where the city dug to replace the water meter. The plumber dug down to find a large hole in the drain pipe. He stated that the hole looked to have been caused by the equipment used in replacing water meters, and since this one was just replaced last summer, he was confident that the hole was caused by the city. The hole was full of gravel and was blocking the flow causing water to back up into my basement. Badger Underground contacted the Water Company Inspector and he too confirmed that the drain pipe hole was caused during the replacement of the water meter done by the Water department when changing the water meter shut off. The Field Supervisor contacted was Tim Singbeil.

I am requesting a reimbursement of \$6,669.50 which will cover the cost of the invoice from Badger Underground of \$5,549.50 and the cost of the coin operated washer and dryer in the amount of \$1,800.00.

Tim Singbeil can be reached at 414-286-6311. Jeff of Badger Underground completed the fix and he can be reached at 262-502-1220. If you have any questions, please contact me at 414-702-9572.

Thank you
