With all due respect,

This is incredulous when most of the residents here still have lead pipes. I have my letter from the City of Milwaukee stating I have lead pipes and no solution in sight. In this day and age AI has literally made everyone more dumb and hasn't held anyone accountable. On top of that it uses our water which renders it unusable after cooling down. In putting an AI center especially in a black neighborhood! Why not in Riverwest, West Allis, Bay View? Its screams systemic racism and lack of care for your constituents. It would be better to put a grocery store instead of an AI. My name is Nicolas perez and I strongly oppose an AI data center, Nicolas Perez
