

December 5, 2001

To the Honorable,  
The Common Council

Dear Honorable Members:

The 2002 Capital Improvements Program contains a Purpose Account, Public Safety Communications and Control, from which funds are allocated to the Paving Related Projects, City-Wide Telephone System Expansion and Improvements, General Engineering, and Transmission Plan Expansion. This allows the maintenance, expansion, and improvement of the City's communication system.

I, therefore, respectfully recommend the adoption of the attached resolution which allocates funds from the parent Communications and Control Purpose Account to the above mentioned new sub-accounts.

Please have this file introduced at the December 21, 2001 meeting of the Common Council.

If you have any questions or would like any additional information, please contact Gerard Froh at extension 3547.

Very truly yours,

Mariano A. Schifalacqua  
Commissioner of Public Works
