As a resident within the Midtown area, I find this potential AI data center to be dangerous. As people in Memphis, Tennessee have already experienced, the effects of AI data centers are destroying the way of life for many. For example, there are plenty of cases of people getting sick and utilities are going up due to the excessive cost of water. Do not put the lives of Milwaukee residents at risk. The people of Midtown deserve a place where there is an abundance of clean water and air. Do not pollute our area more than it can take.
